**Please read and initial each of the following items.*

_____**Acupuncture** is a safe and effective method of treatment. Each patient can expect some points to be more sensitive than others, with brief pain-like sensation(s), especially where there is less flesh (near nails, fingers, etc.) Each patient is different, with focus on energy stagnation, depending on the person. It can occasionally cause slight bleeding that usually resolves with pressing dry cotton where the skin is bleeding. It is also normal for the patient to have a temporary warm, tight, sore or tingling sensation and minor bruising/lump at the acupuncture site. None of these symptoms are permanent.

_____**Acupressure/TuiNa/Manual Therapy** involves rubbing, kneading, pressing, and stroking, etc., which may result in muscle soreness at the massage site that can last several days. This technique may require disrobing. I understand all attempts will be made to assure my privacy.

_____**Herbal Supplements** are safe, effective Chinese herbs, specific to my condition(s) that will not affect or interact with other medications. I understand that I may request ingredients for herbs. I understand I may consult with my family doctor. I understand that if I am uncomfortable or if concerns arise, I may stop taking them at any time.

_____**Indirect Moxibustion** requires burning an herbal material near the skin or on an acupuncture needle. Every precaution is taken to prevent skin contact, but the possibility of skin contact and mild burns exists. GWCM does not allow direct moxibustion where material contacts the skin. Please refer to https://www.chinesedrs.com/new2/after-treatment for after-treatment care.

_____**Cupping** involves a localized suction produced by heating a small glass cup. There is a possibility of local bruising from the suction and slight burning or blistering due to the heat involved in the technique.

_____**Scraping/GuaSha** involves scraping over a small area by using a smooth-edged instrument. There is a possibility that local bruising is likely to occur at the site where GuaSha is performed.

_____**Tapping, Plum Blossom, Bleeding, Pricking** all involve multiple needle pricks at a localized site. Slight bleeding and/or bruising at the treatment site are a likely occurrence. Only single-use needles are used in these procedures.

_____**Electrical Stimulation/TENS** uses micro current electricity to stimulate acupuncture points. A mild tingling sensation of electricity will be felt.

_____**Infrared Heat** involves utilizing infrared radiation. It is a safe and medically proven method of healing. If you are pregnant or have scar tissues, diabetes or hernia, please inform therapists and doctors to avoid direct infrared lighting to stomach or too closed to skin.

I have read, or have had read to me, the above consent and information, and am aware of that I have the opportunity to ask questions with GWCM. I consent to treatments that involves the above procedures for my present condition(s) as well as future conditions. I have the right to refuse or discontinue any treatment at any time and understand that this refusal may affect the expected results. I understand that I may visit https://www.chinesedrs.com/new2/after-treatment for after-treatment care and may contact GWCM at anytime if I still have concerns or questions.
